Ink and Wintel N.V. aim to modernise Suriname travel

**Ink Innovation and Wintel N.V. partner to digitally transform the
passenger experience and hospitality services in Suriname.**

Alicante, Spain — 9 October 2025: Ink Innovation (Ink) announces a new partnership with Wintel N.V., a leading IT company in Suriname, to deploy Ink's portfolio of solutions for making travel effortless. This collaboration will help modernise journeys and guest experiences at airports and across hotels in Suriname.

Through this agreement, Wintel N.V. will focus on enhancing passenger processing and payment solutions at major travel hubs in Suriname.

The partnership seeks to extend into the hospitality sector, where Wintel N.V. will introduce Ink's mobile check-in and payment platforms to several of its hotel clients. This expansion will bring intuitive, technology-driven experiences to travellers from the moment they arrive in Suriname until they check out of their accommodation.

Nelson Kam, CEO of Wintel N.V., said:

"Our partnership with Ink Innovation is an exciting milestone in bringing modern, connected travel experiences to Suriname. By introducing Ink solutions at both the airport and within the hospitality sector, we're creating a journey for guests that sets new benchmarks for better services in the region."

Anticipated outcomes

- Deployment of Ink solutions at major travel hubs in the country.
- Introduction of Ink's mobile check-in and payment platforms at major hotels.
- Positioning Suriname as a modern, traveller-friendly destination in the region.

About Ink. Ink is a technology company that enables airlines and airports to modernise service delivery. It helps to bridge legacy systems to the Offer–Order–Settle–Deliver (OOSD) architecture while keeping today's operations reliable.

Its cloud, mobile, and biometrics-enabled platform covers passenger services, airport operations, and data exchange, from check-in, boarding, baggage, and disruption handling to payments and

government integrations. Ink supports legacy messaging and IATA's ONE Order standard, ensuring reliable operations today and readiness for modern retailing.

Customers include Copenhagen Airport, JFK Terminal One, Riyadh Air, Jet2, TUI, and Menzies Aviation. Learn more at www.innovation.ink.
